

## Questions of further improvement of the business management system

*Imodinov Khamidillo Soyibjonovich*

*Senior Lecturer, Department of Accounting, Analysis and Auditing, Andijan Institute of Agriculture and Agrotechnology*

### ABSTRACT

*The article examines the specificity and objective necessity of innovative development aimed at improving risk management in the development of business entities, and also discusses issues of further improving the business management system.*

**KEYWORDS:** *Risk, entrepreneurship, management, investment, innovation process.*

**Introduction.** Ensuring the country's food security in the context of global integration requires that the sector be flexible, adapt to the changing external environment, and influence various innovations and scientific and technological developments on the basis of sustainable agricultural development.

The modern stage of agricultural development in many developed countries of the world is the transition to an innovative model that provides a systematic integration of the agricultural sector and science and technology to increase its efficiency.

The concept of development of the socio-economic complex of the Republic of Uzbekistan until 2030, developed on the basis of the Decree of the President of the Republic of Uzbekistan dated January 8, 2019 No. 145614, the President of the Republic of Uzbekistan dated July 6, 2020 No. PF-No. Decree of the President of the Republic of Uzbekistan dated April 27, 2020 No. PF-95986 "On additional measures to support the population and business during the coronavirus pandemic", Decree of the President of the Republic of Uzbekistan No. PF-No. 6155 dated February 3, 2021 "On the State Program for the Implementation of the Strategy of Action in Five Priority Areas of Development of the Republic of Uzbekistan for 2017-2021." in the Year of Support for Youth and Public Health "and others, to a certain extent, this study will serve the implementation of the tasks set in the normative documents.

As the first President of the Republic of Uzbekistan IA Karimov said: "... The main task for us is continuous technical and technological renewal of production, constant search for domestic opportunities and resources, deep structural changes in the economy, modernization and diversification of industry. Should consist of a consistent continuation of the work "[2]

This important task is reflected in the Decree of the President of the Republic of Uzbekistan Sh.M.Mirziyoev "On the Strategy for further development of the Republic of Uzbekistan": strengthening macroeconomic stability and maintaining high economic growth, increasing the competitiveness of the national economy, modernization of agriculture. and rapid development .... [3]

Indeed, in the context of modernization of the country, through the improvement of organizational and economic mechanisms for the innovative development of rural infrastructure, it is necessary to provide services to agricultural and agricultural producers at the level of demand and fully meet their needs.

T.L., Ksopvat P., Shimpetep Y. and service to others. "Analysis of the problem of the split and the new threat to the competitiveness of the enterprise Badalov A.G., Bek Yu., Vopobyev S.N., Dolgodysh A.I., Eliseev M.A., Zybov L.V., Yod E.V., Liu Ch., Knight FX. Pokpovskiy A.M., Falin G.I., Shvets V.K., Yuldashev P.T. for example myalliflap." "Baldin K.V., Bezdenny V.M., Bepntstein P., Bpega G.V., Volkova M.V., Zabipova L.M., Zapipov P.Ya., Koktin P.S., Makhyanova M. A., Nekpylova N.V. and the work of others. "

**Research Methodology.** Currently, large-scale reforms are being carried out in our country to ensure the smooth implementation of business activity, reduce the gap in business and increase the investment attractiveness of the republic. For this, the main types of alternative tests and extracurricular activities are blocked, types of licensed activities and special procedures have been developed and systematized.

"Increasing the competitiveness of the economy of our country, strengthening support for enterprises engaged in the export of goods, the development of small farms, small businesses and economic enterprises."

On October 5, 2016, the President of the Republic of Uzbekistan issued a Decree "On additional measures to ensure the rapid development of entrepreneurial activity, comprehensive protection of economic property and improve the quality of the business environment." It aims to strengthen the business environment. Small business and hybridization of small enterprises, providing them with comprehensive support and increasing the investment attractiveness of the republic. "

By active tadbipkop, we mean the development of a competitive makhtsilot, and most importantly, the creation of a new business, an entrepreneur who not only feeds himself and his family, but also benefits society as a whole. Our first task is to expand the canteen, bring the most modern technologies and equipment to our country and cover it. "

**Innovative activity** is the introduction of a new or improved type of product in production, the introduction of a new or improved technological process, the production of products with a higher quality content for consumers or to increase the competitiveness of the product.

**Innovative infrastructure** – "Improving the risk management function of research activities with the development and implementation of the research environment requires the integration of the following research activities, as well as the following: "Improving the risk management function of research activities requires:

1. "Organization is an opportunity to hire an employee who is willing to work in a dying pickup shop and close the command post (permanent or temporary)."
2. "Forecasting is the ability to multiply a situation, which, in turn, leads to the emergence of a new master key or modification of an existing master key. Mazkyp is especially important when analyzing situations and circumstances that can reduce existing laundering or replace existing ones, as well as look for new opportunities in the field of creative beer. "
3. "Accessibility" is the ability of the tadbipkop line to reproduce the controlled pick to allow the bag to be picked up by the pickup.
4. "Coordination is the ability to ensure the effectiveness of the unit's activities in the structure of tadbipkoplik and in the external tadbipkopy environment (if the situation is not national, including anti-monopoly legislation)."
5. Control the ability to conduct closed operations and comprehensive verification of the results obtained at typical stages of the selection process. The Mazkyp function has been confirmed, in particular, it does not allow to complete the workflow in the area of epithelial coagulation.
6. Monitoping is the ability to track Japanese emerging inside and outside the tadbipkoplik chain

<https://cejsr.academicjournal.io>

and, through napca, primarily allows us to identify emerging threats and new opportunities. "

7. Promotion - the ability to activate the work of the picker and other employees in the picker.

"Threats associated with a pickpocket, in addition to the above, with errors and inaccuracies in the perception of a pickpocket, assessment of a positive result and the distribution of powers and responsibilities for driving a pickup (material, spiritual, personnel, etc.).

"At present, large-scale reforms are being carried out in our country to ensure the smooth implementation of business activity, reduce the gap in business and increase the investment attractiveness of the republic.

### Analysis and results.

1. Entrepreneurship is "the most cyclical type of economic activity that is focused on meeting the solvent needs of consumers and does not allow the widespread introduction of innovations and the use of information technology."
2. Identification of the most important aspects of risk acceptance and risky actions in the complex allows us to solve two problems that are inextricably linked with the beep-beep: minimizing the negative impact of risk; use emerging risks as an alternative to finding alternative solutions and new opportunities.
3. The Risk Management System in Japan is a risk management system in an integrated organizational and legal system.
4. There is no systematic classification of the risk of tadbipcoplip in the economic literature on tadbipcoplik myammolap. In order to classify risk, in our opinion, it is necessary to determine the acociliary nature, which, first of all, makes it possible to single out the risk into a specific risk. Thus, the risk can be classified as follows: greater than the length of time; picky about dapajak; the consequences are greater than hysteria. "
5. To ensure the safety of the enterprise, the analyst must analyze the level of risk, use verbal or mathematical methods, simulations, study technical experiments and experiments with mytaxaci clap, use information technology to design and analyze individual elements, and design and analyze individual elements. choose the best vapiant, take capoplap on our own experience, in shilap. The correctness of the job category ensures the safety of the job.

**Conclusions.** At present, the socio-economic development of the countries of the world differs from the previous ones in its significance and content. The most important and important aspect of this is the growing integration and globalization of the national economy. At the same time, Japan is facing a slowdown in international competition and increased efforts by the country to strengthen its position in the international labor market. "

When developing and implementing an investment project, it is possible to highlight, kiss, identify and analyze a sound signal such as belching, which is possible during the implementation of the project. It is important to take into account the pickup itself.
