**Abstract:** *This article is about methods that are completely new to learning English and help the student learn quickly. There is also extensive information on the usefulness of these methods.*

**Keywords:** *educational technologies, videos, organizers, various tables.*

### 1. Introduction

Nowadays, the demand for language learning, especially English, is growing. Recently, based on my interests, I looked at the statistics of the history of Internet searches of Uzbek youth to learn English through Google search. I was surprised. The reason is that I feel dizzy because of so many keywords. This shows how high the demand for English is.

I would also like to inform you about new methods of learning English grammar based on my research.

Grammar cannot be ignored. Proponents of alternative and communicative techniques need to be taught and taught grammar rules, no matter how they struggle with the “looting” of grammatical rules and the tedious execution of exercises. In the early stages of research, it will be easier for you to learn the finished rules and exceptions than to identify the patterns independently.

### 2. Main part

The first method is educational technology, which is the effective use of modern information technology in the educational process. It also aims to improve the quality and effectiveness of education through the introduction of modern innovative technologies in the educational process. In particular, there are several advantages to using such information and communication technologies in learning a foreign language. The role of modern technology in language learning and teaching is invaluable. Listening comprehension through technology is one of the most important parts of language learning. This requires the student to pay attention to the speaker's pronunciation, grammatical rules, vocabulary, and meanings at the same time. An important factor in the use of modern technologies in education is the ability of students to know and use information and communication technologies. Teaching and learning a foreign language using modern technology is one of the most effective ways. In this process, including:

- When using computers, the student can watch and listen to foreign language videos, demonstrations, dialogues, movies or cartoons;
- It is possible to listen and watch radio broadcasts in foreign languages and TV programs;
- CD players are available. The use of these tools will make the process of learning a foreign language more interesting and effective for students.

This method helps you to memorize the grammar rules you have just learned.

The next method is that in the process of globalization, it is difficult to imagine our lives without the Internet. It is one of the most effective ways to learn and use a foreign language. You will be able to communicate with foreign speakers through the Internet. Writing exercises can be improved by writing a letter via e-mail. This method is very useful not only for grammatical rules, but also for word order in English.

The use of graphic organizers in the educational process is one of the most important visits in the coverage of the topic, its delivery to students. It is also possible to use several different graphic organizers to illuminate a theme. When teaching a foreign language, it is advisable to use graphic organizers to explain new words and grammar rules. These can be easily memorized by graphic organizers.

The use of different tables in the process of teaching a foreign language is also very effective. Using tables in the learning process, students can follow a specific grammatical rule, such as composing sentences using tenses and placing new words.

Another but unusual method is to combine this learned grammatical material with a dictionary to reinforce it. For example, once you learn, tell a story about your family or work day, find out the level of comparison of qualities - describe weather data from yesterday and today, learn quantitative terms - write a recipe for your favorite dish. This method may seem very simple or straightforward, but with this method you will be able to memorize the rules by speaking in English on a daily basis, and you will gain the skills to speak in English.

Another unusual method is the daily practice of the rule you have just learned. It should be simple articles and news. For example, once you learn, tell a story about your family or work day, find out the level of comparison of qualities - describe weather data from yesterday and today, learn quantitative terms - write a recipe for your favorite dish. This method may seem very simple or straightforward, but with this method you will be able to memorize the rules by speaking in English on a daily basis, and you will gain the skills to speak in English.

Another unusual method is the daily practice of the rule you have just learned. It should be simple articles and news. Or unadapted literature, originally unnecessary complex structures destroyed, there are exercises for explanation and reading. It is convenient to read books electronically using an electronic dictionary because point to an unfamiliar word and the dictionary provides a translation that is much simpler than a paper translation dictionary.

### 3. Conclusion

The initial stage of learning English is the most difficult stage, and it is this stage that lays the foundation. You have to overcome the language barrier and completely lose your self-confidence or desire to learn the language. Remember the simple rules for successful learning of English:

1. Find a professional in your field, not just a teacher, and if you don't have the opportunity and desire, become your own teacher.

2. Exercise regularly, don't learn new things without repeating what you've learned.

3. Teach all types of speaking activities: listening, speaking, reading, writing. Incorporate English into your life so it responds.

4. Love what you do to make learning a language a part of your life and a pleasure. With the right methods and materials, it will be easy!

These methods help to learn grammar rules quickly and easily, as well as increase the vocabulary needed to speak English fluently, which ensures that learning the language through these methods does not take much time and money.
